

# Specification Sheet

Product No: V6062  
Product Name: Vancomycin hydrochloride  
CAS: 1404-93-9  
Formula:  $C_{66}H_{76}Cl_3N_9O_{24} \cdot xHCl$   
Formula Weight: 1449.25 (free base basis)  
Specification: 生物技术级  
Version: 2025-07-03

| Test                                    | Specification                                                                |      |
|-----------------------------------------|------------------------------------------------------------------------------|------|
|                                         | Min.                                                                         | Max. |
| Water by Karl Fischer                   | 0%                                                                           | 10%  |
| pH                                      | 2.5                                                                          | 4.5  |
| APPEARANCE                              | White to Orange-Brown Powder                                                 |      |
| SOLUBILITY (50 mg/ml, H <sub>2</sub> O) | Clear, Colorless to Dark Yellow and Very Faint Orange to Faint Orange Liquid |      |
| POTENCY                                 | ≥ 900 IU/mg ( Anhydrous Basis )                                              |      |
